*"Your Total Patient
Lift Solution"*

GENEVA

Supine Bathing System

Height Adjustable

Fixed Height

The RS8 Geneva is designed to bathe highly dependent residents safely and comfortably and is compatible with a wide range of transport and lifting devices.

The key-hole shape enhances patient comfort with extra room for the shoulders and arms, plus allows the caregiver closer and greater access to bathe the resident. The height adjustable model is raised or lowered at the touch of a button and allows the caregiver to work at the proper height, thus eliminating back strain. The optional Auto-fill eliminates waiting and/or observation time when pre-filling the bathtub to a pre-set level.

The smooth and soft lines of the RS8 Geneva will enhance the look of your bathing area and allow for effortless maintenance and cleaning. Featuring a full range of standard and optional features, the Geneva is designed to enhance the bathing experience for both the resident and the caregiver.

The Rane Bathing and Accessibility product line provides a unique combination of style, ease of use, comfort and low cost of ownership.

The built-in disinfection system cabinet is conveniently located on the front side of the tub for easy access. The lockable cabinet provides a secure place for cleaning supplies and disinfectants.

The air jets on the Air Spa System feature spring loaded check valves for back flow prevention, which eliminates the extra step to disinfect the air lines.

"Your Total Patient Lift Solution"

Standard Features

- Thermostatic Mixing Valve with anti-scald protection that dispenses 15 gallons per minute for fast tub fill.
- Battery Back-up in case of power failures (Height Adjustable model only).
- Built-in Disinfection System for disinfection of the bath's external surfaces minimizes the risk of cross-infection.
- Handheld Shower Wand for hair and upper body washing, which can be used at the same time the tub is filling.
- Analog Thermometer for monitoring tub-fill and shower wand temperatures.
- 3/4" Supply Lines constructed of stainless steel.
- 24-hour Service Department.

Optional Features

- CleanRane™ Air Spa System with variable speeds that enhance the therapeutic and relaxing effects of bathing for the user.
- AutoFill is a time-saving feature that enables the caregiver to fill the tub to a pre-set level (24 gallons).
- Footboard to stop patient sliding further into tub.

Why CleanRane™ Air Spa System?

The CleanRane™ Air Spa System enhances the therapeutic and relaxing effects of bathing and provides a pleasant experience for the resident. Hydromassage provides millions of preheated air bubbles in the water which increases stimulation of peripheral blood circulation, reduces pain and inflammation in the joints, gently massages away dirt, and induces deeper relaxation. The hygienic, low maintenance CleanRane™ Air Spa System features 12 air jets with spring loaded check valves for back flow prevention. Unlike most other whirlpool and air spa systems, the CleanRane™ Air Spa System does not allow water to enter the air lines, which can become a breeding ground for bacteria and mold. The motor is quiet, efficient, and has a ceramic heating element that blows warm air to help maintain the water temperature and warm the surface of the tub.

Technical Specifications

Length (Fixed Height)	84 inch
Width (Fixed Height)	35.5 inch
Rim Height (Fixed Height)	32.5 inch (lowest setting)
Length (Height Adjustable)	90 inch
