"Your Total Patient
Lift Solution"

PPSGlide

Single Patient Use Lateral Air Transfer System

PPS Glide allows two nurses to laterally transfer a patient safely while reducing the potential for back injury. The core of the system is an inflatable mat that lifts and floats the patient on a cushion of air, that with very little effort, caregivers can transfer even very large patients from one surface to another.

Patient Transfer

Extended Pull Handles allow two caregivers to laterally transfer the patient while maintaining an ergonomic posture.

Blower Unit

Lightweight blower unit supports all three PPS Glide mat sizes.

Roller Tote

Compact roller tote makes transport and storage of the PPS Glide System simple.

Air technology lets patients ride comfortably on a cushion of air

Safety straps secure patients to the transfer mat

Complete system conveniently stores in roller tote

Significantly reduce pull force compared to slide sheets

Standard Features

- 3 different sizes of Single Patient Use Glide transfer matt
- Lightweight blower unit with expandable air hose (8' max)
- Hook and strap to hang blower unit

Optional Features

- Blower caddy
- Wall mount for blower caddy
- Convenient roller tote
- Transfer bridge
